

If an 8-thread depth is desired thread the frames as follows: first thread in frame 4, next in frame 3, then 2, 1, 4, 3, 2, 1, and follow with 2, 3, 4, 1, 2, 3, 4. This gives you the depth of an 8 thread point. Repeat the above by starting with next thread in frame three.

The foregoing instructions will give you the same size points all the way across. You can thread the twill half way across the piece in one direction and the other half in the opposite direction. This will bring the twills to a point in the center of the piece.

It is possible to have a variety of different sizes of zig-zags in the same web as the following pages will describe. As a further illustration we give you complete and detailed information for producing the Hollywood pattern rug which is a combination of zig-zag weaves.

(These weaves can be made either with warp of one color or a combination of contrasting colors. The latter is very effective.)

#### WRITE US

If there is anything you don't understand, write us at once. We will be glad to help you out.

If the loom works a little hard at first, it is because the parts are rough and new. Plenty of oil and a few days' use will make a big change.

Don't become discouraged if everything doesn't go right on the start. You must get acquainted with the loom and at first you are apt to do everything the hardest and most awkward way.

We have tried to be plain and practical. If you use proper care, the loom should last you many years and be a source of pleasure and profit.

#### HAND LOOMED RUGS

There is an ever-increasing demand for rag and filler rugs. Prepared rug filler, cotton and woolen rags are mostly used.

These rugs are woven in various sizes: 27"x54", 30"x60", 36"x72", however, the 27"x54" seems to meet the general demand, hence it is the most popular size.

In order to produce an attractive rug care must be exercised in the color combination and not have too many colors in a rug.

In this book we have given information regarding materials, their preparations, etc., also detailed instructions how to proceed with the weaving.

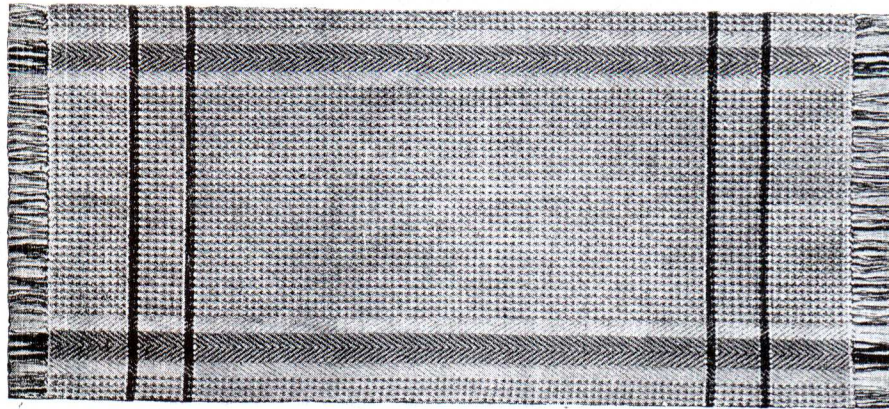

#### HOLLYWOOD PATTERN RUG

In order to give you a more comprehensive idea of the various combinations of zig-zag weaves, we give herewith complete and detailed instructions for producing the Hollywood pattern rug.

We suggest making up a few sample rugs of this weave. They are very attractive, something entirely different from the ordinary.

Prepared rug filler (roving) was used in producing the rug we are describing. The weave, however, works equally as well with rags or other weaving materials.

The color combinations as to warp, stripes or borders we refer to are merely suggestions and you can make changes to conform with your own ideas.

\*A single shot of either white or black filler (which ever harmonizes best) at the point the two contrasting colors (used in the body and stripes or border) meet, has a tendency to "set up" the stripes or border more prominently.
